

# Rabies and Core Vaccine Titer Testing Partner Program

## Canine and Feline Rabies Vaccine antibody titer testing (KSVDL):

- Titer sample is shipped to Kansas State Veterinary Diagnostic Labs.
  - **Requirements: 1-2 mL of serum, transferred to a red top or preservative-free tube.**
- Turnaround time for results is approximately 4-5 weeks. The results will be reported back to your clinic by email.
- Please note, the lab only reports a **pass or fail** using the 0.5 IU/mL as a benchmark for their Rabies titer.
- **This type of titer is not generally accepted for import or export purposes**

## Canine or Feline Core Vaccine antibody titer testing (KSVDL):

- Titer sample shipped to Kansas State Veterinary Diagnostic Labs.
- The test parameters measure antibody titer to:
  - **Canine Distemper, Adenovirus and Parvovirus** OR
  - **Feline Panleukopenia, Herpesvirus and Calicivirus**
  - **Requirements: 2mL serum, transferred to a red top or preservative-free tube**
- Turnaround time for results is approximately 4-5 weeks. The results will be reported back to your clinic by email.

## Canine Core Vaccine antibody titer testing (in House):

- Performed in-house by our staff using the VacciCheck Antibody Titer Test kits available through Veterinary Purchasing.
  - Test parameters measure antibody titer to Canine Distemper, Parvovirus and Infectious Hepatitis.
- Sample(s) you provide will be processed in house, and results reported back to your clinic via email.
- **Requirements: 1 mL serum, transferred to a red top or preservative-free tube**
- Turnaround time is approximately 1-2 weeks.

### **\*Shipping Charges:**

Overnight shipping is required for all KSVDL titer tests. The cost for shipping to KSVDL charged per batch of samples/per clinic. (E.g.: One sample or 10 samples shipping to KSVDL equals one charge). There are no shipping charges required for DAP in house only titer tests.

### **Main Street Veterinary Services**

2360 Main Street ▪ London ON N6P 1P9 ▪ 519-203-2000
