

HerbaCoat™ is the Finishing Touch after Every Bath

- ✓ An all-natural afterbath coat conditioner
- ✓ Creates a healthy and shiny coat
- ✓ Maintains healthy skin for any minor skin irritations
- ✓ Water-based formula
- ✓ Leaves no oily residue
- ✓ Easily removes excess dirt and dust
- ✓ Has a robust herbal oil scent
- ✓ Contains a blend of neem, citronella and lavender oil
- ✓ Recommended for dogs only, not suitable for cats due to their self-grooming behaviour

HerbaCoat™ offers a natural, topical alternative solution leaving your dog's coat shiny and manageable. It has a natural herbal scent containing a soothing blend of three well-known herbal oils and aloe vera. The oils in HerbaCoat™ have traditionally been used for these properties: neem oil has antibacterial and antiseptic properties and can help soothe itching and discomfort; citronella oil is known to help soften the skin, coat, and is helpful for minor skin irritations; lavender oil helps to relieve minor skin irritations and is beneficial for itchy or dry skin; and aloe vera is known to effectively soothe itching from minor skin irritations. Apply liberally to your dog's body, avoiding the mouth and eyes. HerbaCoat™ is recommended for dogs only and is not suitable for cats due to their self-grooming behaviour.

Ingredients: Citronella Oil, Lavender Oil, Neem Oil, Water, Surfactant, Aloe Vera, Sunflower Oil, Glycerine.

Omega Alpha's products are made from all natural human grade ingredients therefore product may have batch differences in colour and taste.

Available in 120 mL and 1 L sizes.
Shake well before use, for external use only.

Get to know the ingredients in HerbaCoat™

Aloe Vera is typically used in natural remedies for humans and found in traditional medicine (India) for constipation, digestion and minor skin infections. In Traditional Chinese medicine, it's often used in the treatment of fungal diseases, and in the Western world, it has found widespread use in the cosmetic, pharmaceutical and natural health food industries. There are two parts of the plant used: aloe vera gel is the clear, jelly-like substance found in the inner part of the aloe plant leaf. Aloe vera latex comes from just under the plant's skin and is yellow in color. Aloe vera's active components have been identified in the plant includes: vitamins, minerals, saccharides, amino acids, anthraquinones, enzymes, lignin, saponins and salicylic acids. Aloe vera has a host of internal health uses for humans, however, the topical uses for aloe vera applied for skin conditions is equally interesting. These include holistic uses for psoriasis, dermatitis, minor wounds and burns. It can be used safely as an antifungal and antimicrobial agent. Aloe vera helps to stop the itching associated with dry, irritated skin as it helps to moisturize and protect the skin. Many shampoos and topical cleaners are full of chemicals that damage or dries the skin and can even cause inflammation and skin irritations. In addition, aloe vera is an effective way to keep the skin free of bacteria and uncomfortable skin reactions. Aloe vera possesses anti-inflammatory, antibacterial, anti-fungal, antiviral, antioxidant and antiseptic properties. It is used as a topical agent in HerbaCoat™.

Citronella oil is used as a topical agent in HerbaCoat™. It helps relieve joint/muscle aches associated with sprains, strains, rheumatoid arthritis. It can be used as a carminative/anti-spasmodic for relief of digestive discomfort. Citronella has anti-rheumatic, carminative and anti-spasmodic properties.

Sunflower Oil is linoleic acid produced by expressing the oils from sunflower seeds and is typically used internally in the body. It is low in saturated fat, which makes it a better choice than oils and fats that are high in saturated fat. Sunflower oil helps with blood clotting and immune system response, and has anti-inflammatory, expectorant and stimulant properties. Sunflower oil is used as a topical agent and surfactant in HerbaCoat™.

Neem Oil is loaded with nutrients and is high in important fatty acids and vitamin E, and can quickly penetrate outer layers of skin. It's extremely effective in healing dry and damaged skin. It is used in holistic health care products because it contains high levels of antioxidants that help protect the skin from environmental damage. Neem also helps fight free radical damage in the skin because it contains a phytonutrient called carotenoids, which provide high antioxidant action. As a result, neem oil and neem extracts are widely used in cosmetics such as soap, hair products, cosmetics, hand creams and pet shampoos. The fatty acids and vitamin E found in neem oil are easily absorbed into the skin without leaving the skin greasy. Once absorbed, these powerful properties work to rejuvenate the skin's cells and restore elasticity. Benefit-rich vitamin E acts as a free radical scavenger by hindering the oxidizing processes in the skin. It promotes soft and supple skin, helps in reducing old scars and promotes healing. The neem plant is known for the following properties: alterative, analgesic, antibacterial, anti-inflammatory and antiseptic.

Lavender Oil is used as a topical agent in HerbaCoat™. It is used as a nervine/calmativ and helps relieve joint/muscle aches associated with sprains or strains. It is used as a carminative/anti-spasmodic for relief of digestive discomfort. Lavender also helps to relieve colds/coughs and has sedative, spasmolytic and antimicrobial properties.

HerbaCoat™ is recommended for dogs only and is not suitable for cats due to their self-grooming behaviour.
